## MULTIQ 322 Touch Signage Monitor

M-LINE

### TOUCH SIGNAGE MONITOR SUITED FOR PUBLIC ENVIRONMENTS

MultiQ touch signage monitor is a modern and compact solution for In-store Web.

The new 22" True Flat touch signage monitor with built-in media player, is an evolution of the MultiQ Classic series media monitors, and has the same great features and durability that answers very well to the challenges of public environments. With greatly improved processing power the projective capacitive multi-touch panel adapted to smartphone like gestures the signage monitor is the perfect platform for displaying your website in your stores (In-Store web) in a modern way.

### FEATURES

The MQ322 Touch Signage Monitor is to be used with the MultiQ digital signage cloud service providing monitoring and a wide range of content management features such as scheduled promotional messages shown while the signage monitor is not used by a customer.

The screen can also be split into an interactive area and two or more non-interactive areas that can be used for

advertising (Windows only).

### HIGH RELIABILITY

The MQ 322 Touch Signage Monitor is designed for continuous operations. The power saving and lead free LED backlight and the possibility to set the unit in standby mode outside business hours makes the MultiQ 322 Touch Signage Monitor an economical- and environment friendly choice. The media player has no fans or other moving parts. The lack of mechanically moving parts assures long lifetime expectancy.

### EASY AND FLEXIBLE INSTALLATION

The compact combination of touch monitor and integrated media player allows for flexible installation. The unit may be mounted directly on a wall, or be used with an optional desktop- or floor stand.
